

SHUBHAM MANKAR

Cloud & DevOps Enthusiast | Python Developer | AWS Practitioner
Pune, Maharashtra | LinkedIn: linkedin.com/in/shubhammankar | GitHub: github.com/shubhammankar

PROFESSIONAL SUMMARY

Motivated and detail-oriented B.Tech Computer Engineering student with hands-on experience in Cloud Computing, DevOps, and Python-based automation. Proficient in AWS services including Lambda, S3, EC2, and SNS, with a strong ability to architect event-driven, serverless solutions. Adept at building real-world projects that solve practical problems — from API-integrated security tools to automated cloud pipelines. Demonstrates a fast-learning mindset, strong problem-solving capabilities, and a passion for building scalable, efficient systems. Actively seeking Cloud Engineer, DevOps, or Software Developer internship opportunities to contribute meaningfully to innovative teams.

EDUCATION

Bachelor of Technology — Computer Engineering MIT Academy of Engineering, Alandi, Pune Savitribai Phule Pune University (SPPU)	Expected 2026 CGPA: 7.25 / 10.0
---	---

TECHNICAL SKILLS

Programming	Python, C, Java, Bash
Cloud & DevOps	AWS Lambda, S3, EC2, SNS, IAM Linux (Ubuntu/CentOS)
Tools & IDEs	GitHub, VS Code, Postman, Tableau, Orange
Concepts	Data Structures, REST APIs, Automation, Serverless Architecture, Data Preprocessing

PROJECTS

Password Breach Checker | Python · REST API · k-Anonymity

- Developed a secure command-line tool to check if a password has been exposed in known data breaches using the HaveIBeenPwned Pwned Passwords API.
- Implemented the k-Anonymity model — only the first 5 characters of the SHA-1 hash are transmitted, ensuring zero exposure of actual passwords to third-party servers.
- Outcome: Privacy-first security utility enabling users to audit password strength without compromising sensitive data.

AWS File Upload Notification System | AWS S3 · Lambda · SNS · Python · IAM

- Architected a fully serverless event-driven pipeline where file uploads to an S3 bucket automatically trigger an AWS Lambda function.
- Configured AWS SNS to dispatch real-time email notifications to subscribers upon each successful upload event.
- Outcome: Eliminated manual monitoring overhead; demonstrated end-to-end AWS cloud automation with zero-server infrastructure.

Data Visualization Dashboard | Tableau · CSV Data · Business Analytics

- Designed interactive Tableau dashboards to visualize complex datasets, surfacing actionable business insights through charts, KPIs, and trend analyses.
- Applied filtering, calculated fields, and drill-down capabilities to enable non-technical stakeholders to interpret data intuitively.
- Outcome: Delivered publication-ready dashboards showcasing proficiency in data storytelling and visual analytics.

Data Preprocessing Pipeline | Orange Tool · Machine Learning Prep · Data Cleaning

- Built an end-to-end data preprocessing workflow using the Orange visual programming tool, performing imputation, normalization, feature selection, and encoding.
- Applied transformations to prepare raw datasets for downstream ML model training, improving data quality and reducing noise.
- Outcome: Reduced preprocessing time significantly; produced clean, model-ready datasets for classification tasks.

QR Code Generator | Python · qrcode Library · Multi-format Export

- Created a Python-based QR code generator supporting custom data encoding for URLs, text, and contact information.

- Added multi-format output support (PNG, SVG) and configurable error correction levels for robustness in real-world scanning environments.
- Outcome: Reusable, lightweight utility demonstrating practical Python packaging and library integration skills.

Linux ATM Simulation System | *Bash Scripting · Linux · File Handling*

- Developed a fully functional ATM simulation in Bash on Linux, implementing account creation, balance inquiry, deposit, withdrawal, and PIN authentication.
- Leveraged file-based data persistence using structured text files with secure read/write operations and input validation.
- Outcome: Demonstrated proficiency in shell scripting, Linux file system manipulation, and logic-driven automation.

CERTIFICATIONS

• Python Essentials 1 & 2	<i>Cisco Networking Academy</i>
• NASSCOM Digital 101	<i>NASSCOM Foundation</i>
• Tableau Desktop Specialist	<i>Infosys Springboard</i>
• AI Fluency Program	<i>LinkedIn Learning / Coursera</i>
• Claude 101 — Intro to Claude AI	<i>Anthropic</i>
• Master AI Development	<i>Udemy / Coursera</i>
